

Freezing Weather, Storms and Traffic Accidents Delay Moderna Vaccine Shipments to Las Vegas

People who were scheduled to receive their 2nd dose of the Moderna vaccine next week (February 18th-22nd) will have to wait an additional week to receive their vaccination. Shipments to Las Vegas were delayed due to freezing weather, storms and traffic accidents across the country. 4,000 people have been contacted to have their appointments rescheduled, but since the Moderna vaccine allows for a 40-day window between doses, most rescheduled appointments shouldn't cause any problems with the vaccine effectiveness.

Pfizer vaccines were delivered on schedule, so this will not affect their appointments.
